

Providing a common platform to unite global performance and continuous improvement initiatives

Background

One of the world's largest pharmaceutical companies

Produces medicines and vaccines for a wide range of medical disciplines

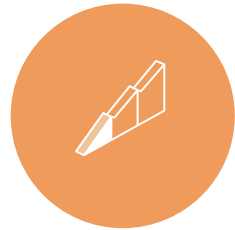

Challenge

No common platform to manage continuous improvement programs, share best practices, track progress and consolidate financials

Lack of visibility into project performance renders management unable to intervene early with underperforming projects

No clear linkage between strategy and performance improvement initiatives

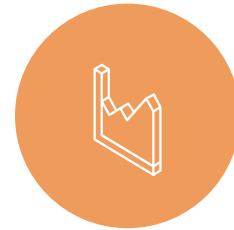

Solution

i-nexus for Continuous Improvement Scale & Sustain package

Product deployment consulting services

Product training services

Product configuration services

Benefits

Common platform aligns, mobilizes, and focuses thousands of employees around strategic objectives and performance improvement

Platform standardizes project delivery using best practices and provides real-time project status allowing early intervention

Clear traceability between strategic objectives and performance improvement initiatives
