

Unifying strategy, quality and continuous improvement activities division-wide

Major US
energy
company

Background

Fortune 200 energy company
World's largest generator of renewable energy
Divisions include power generation

Challenge

Securing a clear line-of-sight into power generation business unit strategy

Building a single source-of-truth across the entire continuous improvement program of lean six sigma projects

Establishing a unified view of benefits, cost savings and efficiencies across the CI program

Solution

i-nexus for Hoshin Kanri Scale & Sustain Package

Product deployment consulting services

Product training services

Product configuration services

Benefits

Hoshin X-Matrix is driving strategy at power generation division, aligning all business units with divisional strategic goals

Single source-of-truth for project and KPI data has created CI program efficiencies, encouraging reuse and reducing costs of maintaining multiple legacy systems

10% reduction in project cycle time in the first year
