

A better way to manage strategy

i-nexus for Strategy Execution

Industry's leading strategy execution management software

i-nexus enables large organizations to successfully deploy their strategy. Starting with capturing strategic goals and cascading them through the organization, i-nexus helps prioritize, align and manage the initiatives needed to meet these goals.

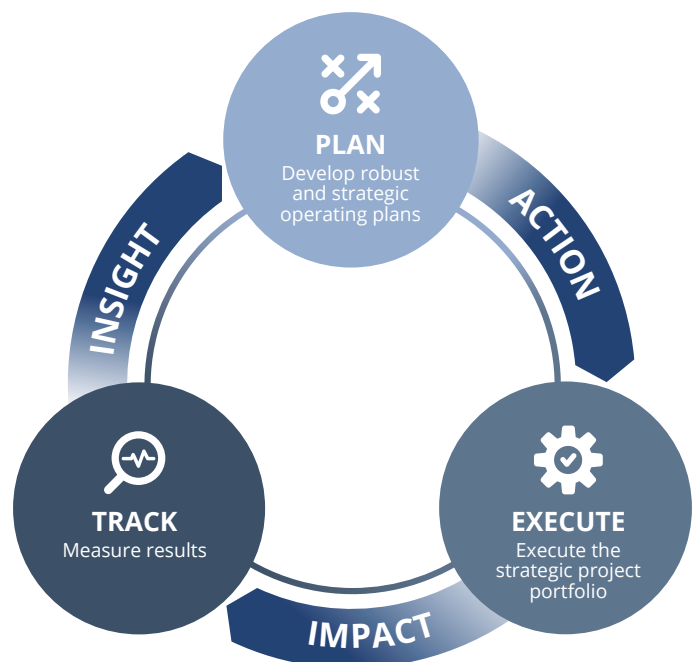

Plus it provides real-time performance measurement to gauge results and drive continuous improvement. All in one tightly integrated platform that's fully featured and enterprise-ready.

With i-nexus, organizations realize the business value of successfully executing to strategic goals faster and with less effort while remaining agile as priorities or market conditions change.

Synchronize and take control of strategy execution

Successful strategy execution depends on three core capabilities that must work seamlessly together: the ability to build robust plans, to execute to plan and to measure results. These capabilities - Plan, Execute and Track - form the foundation of the i-nexus platform, ensuring that strategy is translated into action, and action is translated into results. And it is the insight gained from tracking performance and results that informs any changes to your plan or the creation of new plans.

Whether you are using i-nexus for operational excellence, continuous improvement or transformation, the same three capabilities underpin our solutions: Run, Improve and Transform, respectively. The result is an integrated business system that connects and embeds these practices into the fabric of the organization.

Plan

Define, cascade and communicate your strategic goals

So you've formulated your strategy. Now it's time to translate that strategy into goals, goals in action, and action into results.

Develop robust strategic and operating plans

Use i-nexus to capture and cascade clear goals at all levels of the organization, encouraging two-way dialog and feedback. Then use this insight to build a clear picture of the projects needed to deliver and the key performance indicators that will measure results.

With i-nexus, organizations achieve strategic alignment, focusing resources where they're needed most and ensuring everyone is aligned in direction and purpose.

Key benefits

- Align short-term annual goals with 3-5 year breakthrough objectives
- Drive accountability by ensuring shop floor activities are aligned ultimately to top floor annual strategic goals through a "catch-ball" goal cascade
- Ensure optimal use of resources by selecting the optimal project portfolio that will achieve goals
- Raise confidence in the ability to execute to strategic goals by identifying missing or incomplete plan elements

Key capabilities

Goal Definition

Gain clarity of purpose by identifying clear objectives that are readily cascaded across and down through the organization and targets to achieve

Financial Tracking

Define expected financial targets across complex organizational structures while avoiding double counting.

Performance Targets

Identify measurable metrics to track realized results (impact)

Portfolio Selection

Identify a balanced, optimized project portfolio that's perfectly aligned with strategic goals

Portfolio Planning

Manage resource allocation to ensure projects are staffed and the project pipeline is achievable

Strategic Planning

Ensure your strategic plan is robust, complete and ready to deploy with confidence

X-Matrix

Explore a multi-dimensional planning view of strategy, goals, projects and metrics

"i-nexus transformed our Hoshin Kanri method, replacing spreadsheets with a digital solution. Better still, i-nexus has enabled us to take the next evolutionary step beyond KPI reporting and towards building a stronger countermeasure culture."

Mogens Saigal, Senior Director, Universal Robots A/S

Execute

Proactively manage your project portfolio

Take control of your strategic initiatives with i-nexus' comprehensive portfolio, program and project management capabilities. From planning a new project to real-time performance tracking, i-nexus will help you maintain and execute a balanced, optimized portfolio that's perfectly aligned with your strategic goals.

Execute strategic and operational project portfolios to plan

i-nexus is uniquely designed for today's Enterprise Program Management Office (EPMO) or Strategy Realization office; helping you to overcome the challenges of strategy execution and meet your strategic goals.

Key benefits

- Respond fast and keep the project portfolio on track when project performance is at risk
- Drive optimal results and alignment by balancing "top down" strategic projects with "bottom up" improvement initiatives
- Promote standardization in project delivery by enabling project reuse
- Build a learning organization by investing in training to upskill your workforce

Key capabilities

Portfolio Execution

Track real-time portfolio performance and get early visibility of risks and delivery challenges

Program & Project Management

Create and manage projects, from simple "just do it" projects to larger stage-gate projects and complex programs

Idea Management

Identify winning ideas by soliciting, capturing, evaluating and prioritizing employee ideas

Governance & Compliance

Promote and enforce best-practice methodologies and techniques using project templates and workflows

Learning & Capability Management

Manage training programs and certifications that upskill your change delivery teams

"Same process. Same language. Same reporting. We wanted to build a new organizational capability in project management and i-nexus has helped us to meet this goal."

Dr. Georg Ziglier, Head of Business Excellence, Materials Services, Thyssenkrupp AG

Track

Focus the strategic discussion on results

It's results that matter and with i-nexus, real-time reports let you continuously track progress against strategic goals using metrics. And by comparing actual results against targets, areas of underperformance are identified early allowing rapid course correction.

Measure results

Such a feedback loop is critical to operational improvement and strategy deployment, serving not just to measure progress but also validate direction and planning assumptions.

With i-nexus, don't just measure performance but continuously improve it.

Key benefits

- Ensure sustained operational performance to strategic goals
- Improve performance through exception reporting, timely root cause analysis and countermeasures
- Enhance decision-making by improving accuracy and currency of performance data
- Increase agility by responding sooner to real-time challenges and risks
- Reduce effort preparing and managing performance reporting

Key capabilities

Metric Management

Track real-time actual performance to plan using key performance indicators updated by employees or third-party applications/data sources

Root Cause Analysis & Countermeasures

Bring underperformance back on track by determining root cause and implementing rapid corrective action

Impact Analysis & Benefits Tracking

Drive accountability and validate progress toward strategic goals through real-time impact and benefit realization tracking

Financial Tracking

Track expected financial targets across complex organizational structures while avoiding double counting. Allow clear review and assessment against variable forecast scenarios

"With i-nexus we now have consistent scorecard reporting across an increasing number of business units, giving us real-time insight and the confidence we are investing in the right activities for growth."

Stefan Osswald, Vice President Business Excellence, Flex Inc.

One size does not fit all

i-nexus is a suite of modern applications that are tailor-made to meet the needs of different stakeholders in your organization.

i-nexus Advisor

Gain strategic insight through powerful visualisation and analytics.

i-nexus Workbench

Take control with expert tools for strategic planning, portfolio selection & delivery, and performance measurement.

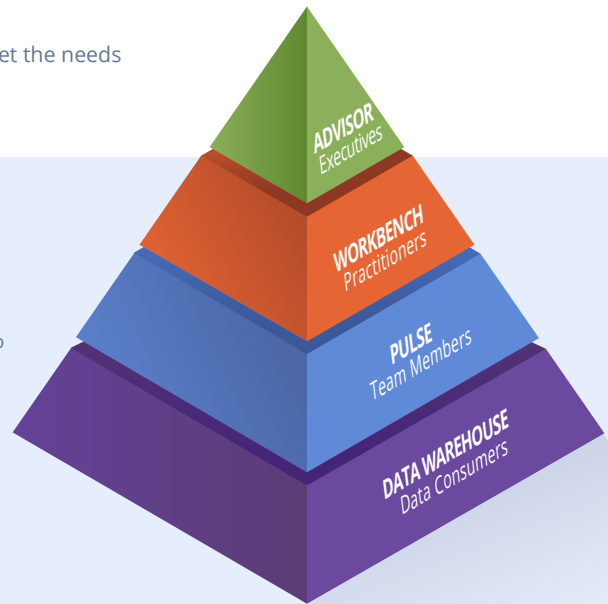

i-nexus Pulse

Make quick updates to metrics, projects and financials on-the-go.

i-nexus Data Warehouse (IDW)

Deliver on ad hoc requirements for reporting and analytics with the BI tools you use already.

Fully-featured platform

Our core capabilities - Plan, Execute and Track - are all underpinned by a foundation of powerful and integrated features; all in a single user interface that can be accessed using a browser. What's more, these features are easily configured as your needs evolve.

From managing your users and setting permissions, to automating key approvals and collaborating within and across teams, i-nexus delivers the features you need to successfully define your strategic goals, align and execute your projects, and measure your business performance.

Delivering strategy execution as-a-service

i-nexus is a subscription-based software-as-a-service (SaaS) hosted on i-nexus' secure private cloud. With industry-leading security and knowing that i-nexus holds ISO 27001 accreditation for information security, you can be assured that your data is secure and that your software is always-on.
